## 📁 SKILLS

### Frameworks:

Angular, NestJS, Express, Rails

### Languages:

JavaScript, TypeScript, Ruby

### Testing:

Jest, Cypress

### Tools/DevOps/Libraries:

RxJs, Apollo, SCSS, NgRx, GCP, AWS, Sentry, Auth0, Git, GraphQL, Docker, CI/CD, Figma, Material, PWAs

### Things I want to learn:

Go, Machine Learning, Flutter

## 📁 PROFESSIONAL EXPERIENCE

Mar 2019 - Current (Contract)

### Lead Frontend Engineer

#### Sympliact, Inc.

- Architect and implement features in two large-scale PWA Angular applications for patients and healthcare providers
- Successfully onboarded 30-50 patients a day and 1-2 new healthcare practices a week through automated tiered sign up flows
- Developed robust CI/CD flows that require at least 70% unit test coverage and run automated Cypress tests to help prevent regressions from ever reaching production
- Design wireframes in Figma, write fine-grained user stories, use story points to plan out roadmap projections, and ensure HIPAA compliance is met with all our 3rd party services
- Keep compilation times of both large-scale applications near ~3 minutes by rigorously addressing technical debt and zealously seeking to have clean well-tested code

Apr 2022 - Current (Contract)

### Senior Full Stack Engineer

#### Hexa Containment

- Implement features using Ruby on Rails that help improve efficiencies inside Hexa
- Lead, design, and architect a customer portal using Ruby on Rails and Angular to streamline customer purchases

Aug 2021 - Feb 2022

### Senior Full Stack Engineer

#### Otus

- Lead bringing the legacy customer service portal from Angular 6 to Angular 13
- Evaluated self-owned authentication solutions vs SAAS providers like Auth0 and define steps on how to transition
- Facilitate and outline work for migrating legacy Java/PHP systems to Node

- Work with head of product and management to achieve delivering business value while addressing technical debt to reduce regressions

Feb 2019 - Oct 2019

## Lead Software Engineer

### Airvel

- Created both a consumer marketplace for private charter flights and trip management portal for private charter suppliers using Express and Angular
- Worked with both frontend and backend developers to architect distributed GraphQL services using Apollo Federation
- Implemented Stripe to facilitate transactions that were between \$10,000 - \$100,000

2018 - 2019

## Frontend Developer

### axialHealthcare

- Led Angular feature implementation for internal applications used by Pharmacists to monitor patient care

2017 - 2018

## Engineering Manager/Lead Frontend Developer

### Metova Inc

- Wrote features, planned work, and mentored developers on SiriusXM
- Led the effort to reduce the web player's regressions by bringing code coverage up by over 60%
- Worked with senior management at SiriusXM to track team velocity and develop achievable roadmaps using story points
- Rewrote SiriusXM's website from Angularjs to Angular
- Led the original creation of SiriusXM's website and the implementation of live video-streaming with Howard Stern

2015 - 2017

## Full Stack Developer

### Metova Inc

2015 - 2015

## Web Developer Internship

### Metova Inc

## EDUCATION

2010 - 2015

Bachelor of Business Administration (B.B.A.)  
Management Information Systems

Tennessee Technological University
